

LOXAM publishes its first fully digital and interactive CSR report

Paris – October 3rd, 2019

Corporate Social Responsibility (CSR) has always been a key concern for Loxam. As such, ensuring a streamlined and efficient environmental structure, recycling and reusing goods at the end of their life cycle, and enforcing ethical guidelines are guiding principles that have formed the cornerstones of the Group over the last 50 years.

As part of its CSR Commitment, LOXAM has published a CSR report every year since 2015. In an effort to use digital platforms to enhance its key corporate content, LOXAM will now publish a fully digital and interactive edition of its CSR report. Its aim is to provide clients and investors with comprehensive and visual data on the Group's CSR plan, objectives and metrics year after year.

The full report is now available in French and in English here: <http://www.loxam-csr-rse.com/>

You will also find a link to the 2018 report on the investor website under the *Sustainable Development* section.
